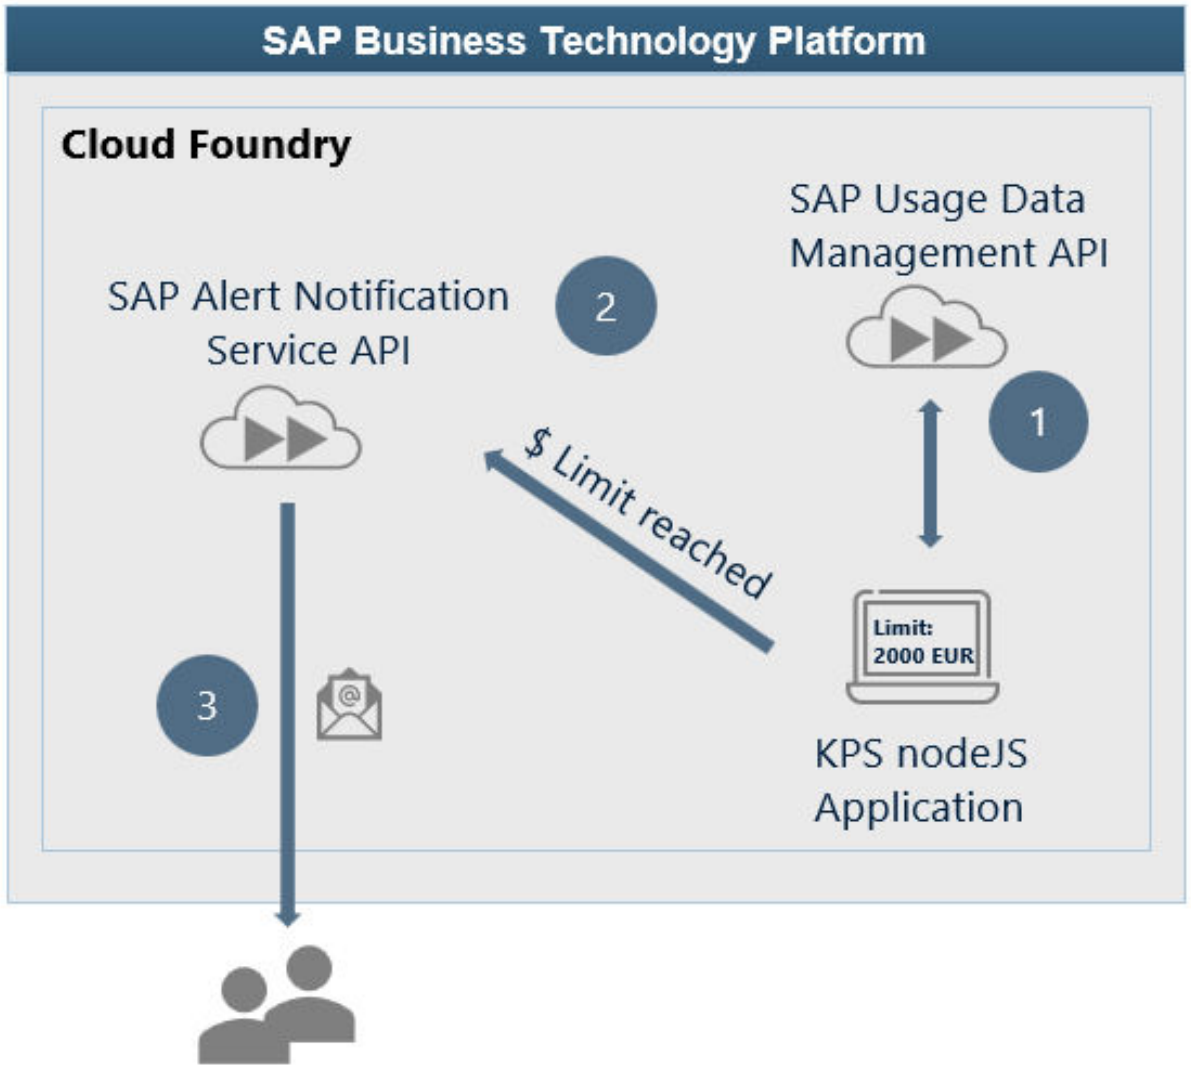
KPS Cost Alert Service – Process Overview

Current Situation / Challenge

There is no alerting mechanism available when a specific amount of subscription costs is reached in SAP BTP

Destination / What is the outcome?

If the SAP BTP costs have exceeded a set limit, set people will be notified via email

How you get there? / What is the solution?


A nodeJS application regularly queries a standard API for the actual Cloud Foundry costs. If the specified limit is exceeded, the standard alerting API is used to inform a set group of recipients
